Environmental Policy

Recognizing and understanding the importance of sustainable development and its responsibility for the state of the environment, Metalchem Kft. considers it a fundamental goal to contribute to solving global environmental problems and improving the state of the environment through environmentally conscious behaviour.

It is firmly committed to:

- to conduct its activities with due regard for environmental protection and in full compliance with environmental regulations,
- to strive to prevent environmental pollution and to manage natural resources in a rational manner, and
- to continuously monitor and improve its impact on the environment.

To achieve these objectives, the company:

- makes its operational and strategic decisions taking environmental considerations into account,
- plans to introduce an environmental management system in accordance with the MSZ EN ISO 14001:2005 standard,
- reduces the risk of environmental pollution that may occur during the transport of chemicals
- pays special attention to the proper disposal of hazardous waste (expired chemicals),
- gives preference to the use of recycled packaging (chemical containers) for the packaging of its own chemicals,
- returns empty chemical containers from its customers free of charge and at its own expense for professional cleaning and reuse,
- takes great care to save energy in its offices and ensures that office equipment, office supplies, and cleaning products are selected with environmental considerations in mind, as well as creating the health and ergonomic conditions necessary for a high-quality working environment,

- When selecting chemicals sold to customers and recommended surface treatment technologies, it continuously strives to introduce new, environmentally friendly processes, taking environmental considerations into account.
- It seeks to find and apply the latest technologies, and therefore regularly participates in domestic and international trade fairs and conferences.
- It conducts its activities in compliance with the domestic and EU environmental legislation in force at any given time.

In addition to operating in an environmentally conscious manner, the company also encourages its business partners to behave in such a way.

Accordingly:

- it expects its suppliers to behave in an environmentally conscious manner; therefore, it gives preference to suppliers who operate a quality and environmental management system or provide products and services of a corresponding quality,
- it only works with waste disposal companies that have the appropriate environmental permits,
- works in close cooperation with the authorities,
- continuously improves the competitiveness of the company by improving the quality of its services and provides active assistance in areas where the domestic selective waste collection system is deficient.
